For industrial use: Storm II

The Kornit Storm II is your perfect tool for entering the industrial direct-to-garment printing market – suitable for small to medium businesses. Like all other Kornit systems, it offers white ink printing for printing on dark shirts, as well as integrated pre-treatment so it is the most efficient solution to print on garments, in photorealistic quality.

Conveyor dryer: Ace 950 PLUS

The Ace 950 PLUS conveyor dryer from Chiossi e Cavazzuti is an electrical hot-air dryer which has been optimized for drying Kornit-printed garments. Thanks to its excellent performance and low energy consumption, it is ideal for starting up a industrial garment printing business. It features the option for accurate temperature settings and the double belt conveyor allows the operator to work in his position without having to move.

NeoPigment™: 1 ink set for multiple fabric types

Based on years of industry experience, our NeoPigment™ inks are created specifically for our Kornit printers. NeoPigment™ inks bring users a host of benefits to include the widest color gamut in the industry, ultimate white performance, and superior hand-feel. With just one ink set, you can print on the widest variety of fabric substrates and experience excellent results every time.
